SERIES 545

Emergency

PHOTONIC.
LIGHTING SOLUTIONS

OVERVIEW

Series 545 is a sophisticated wireless emergency monitoring system. The system uses Bluetooth communication via a Casambi network seamlessly. Series 545 has the ability to create groups, schedule testing, print & email test reports from a touchscreen panel. Each Series 545 touchscreen can support up to 10 Emergency hubs, with each hub capable of 2 separate networks of 64 devices. This equates to one touchscreen capable of 1,280 Emergency wireless devices.

FEATURES

- Touchscreen control
- Password protected
- Group scheduling & testing
- Automated email alerts
